

Clark Forklift Part

Clark Forklift Parts - Performing globally, there are at this time 350,000 Clark forklifts and lift trucks in operation, with more than 250,000 of those in use in North America. Clark has five main lines of lift trucks across the world, making it one of the most expansive corporations in the industry. Heavy duty trucks ranging from 1,500lb to 18,000lb capacities, dual fuel, petrol, LPG, hand powered lift trucks, narrow-aisle stackers and electric riders are a few of their specialties.

Clark Totalift has 20 exclusive designs of lift trucks, with parts covering more than 120,000 specific components for all of its automated equipment. Your local Clark Dealer is your complete source for availability of all your components needs provided by Clark Totalift.

Clark has a extraordinary Parts Supply team. The components warehouses are conveniently situated in Changwon, South Korea and Louisville, Kentucky to ensure exceptional service to both their customers and their sellers. For over 90 years, Clark has exceeded industry standards, being one of the most actively advancing producers. Motivated to supply the highest level of value and service to our clients, Clark remains on the cutting edge when it comes to improving productivity and benefiting performance.

Worldwide, Clark has one of the most outstanding dealer support networks. With over 550 locations globally, dealer representation in over 80 nations and 230 locations in North America, their high level of dedication to their consumers predominates the materials handling industry.

By pioneering the operator restraint system protection feature, Clark proudly remains a leader of innovation in the industrial equipment and automated forklift industry. This exceptional commitment to safety is currently a standard feature on every forklift.

Clark has a continual objective to possess the No. 1 quality system in the industry which is demonstrated by their dedication to ISO standards. Clark, is the first manufacturer of forklifts and lift vehicles to be internationally certified with quality standard ISO 9001 in all of its manufacturing facilities. Furthermore, the ISO 14001 Environmental Conservancy System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement enables Clark to be ready for any environmental restrictions, thus placing them in a prevailing market position.

Clark has preferred the extremely economical and advantageous system of "Lean Manufacturing" for its assembly plants and use of resources. This system was developed to acknowledge the most effective approaches of production facility management and ensuring maximum efficiency. Clark has completed this transition of its Korean plant. COPS which is Clark Optimized Production System, similarly focuses on quality of product and services and manufacturing efficiencies.

By working together, Clark's product suppliers and engineers communicate towards improving product proficiency while minimizing expenses. The contemporary value engineering agenda combines progressive product improvement and delivers superior consumer support and service within the industry.
